

HTML extensions fixture (W-650a51, D-875e4b §1–§4, §6, §7b)

This fixture exercises the HTML subset md2pdf renders through a Typst table primitive: `<table>` / `<thead>` / `<tbody>` / `<tr>` / `<td>` / `<th>` (with `colspan` / `rowspan` and a small CSS subset) plus the outside-cell inline-HTML formatters `<b>` / `<i>` / `<strong>` / `<em>` / `<br>`.

Section A — Basic table

A minimal `<table>` with `<thead>` + `<tbody>`, no styling.

Name	Role
Alice	Engineer
Bob	Designer

Section B — Border styles (D-875e4b §3c)

Three visually distinct border styles: solid, dashed, dotted.

solid	border
-------	--------

dashed	border
--------	--------

dotted	border
--------	--------

Section C — colspan + rowspan

A 3-column grid where the head spans, and rowspan applies to a body cell.

Quarterly results		
Quarter	Revenue	Notes
2025	\$1.2M	Q1
	\$1.4M	Q2

Section D — CSS styling

Padding, vertical-align, text-align, background-color, named colors.

Item	Qty
Widget	42
Gadget	7

Section E — collapsed-border default (D-875e4b §2f)

`border-collapse: collapse` with no explicit `border` produces a 1pt black border per Decision-mandated default.

collapsed	default
-----------	---------

Section F — Outside-cell inline HTML

Recognized formatters in flowing text (paragraph-level pairing per §2h.5):

A paragraph with **bold**, *italic*, **strong-bold**, and *emphasized-italic* spans, plus a hard break and a **nested *combo*** for good measure.

A second paragraph: **cross**-paragraph nesting is not supported (Client-accepted limit) — formatters auto-close at paragraph end.

Section G — Mismatched / unrecognized inline HTML (D-875e4b §6k)

A close tag with no matching open: `</b>` falls through to literal pass-through. An unrecognized element `<span>`like this`</span>` also passes through verbatim. A bare `<br>` mid-text linebreaks cleanly.

Section H — Cell content with formatters and image-less inlines

Inside cell content, `<b>` / `<i>` etc. work the same way.

Header A	Header B
Plain text in bold here	<i>italic</i> body cell
line one line two	strong + <i>em</i>

Section I — End

The end of the fixture.
